

Insinet Group LLC

Background

Insinet Group LLC is a technology company that was founded almost ten years ago. With over 22 years of management experience, we specialize in the telecommunications sector, with a primary focus on serving the logistics industry. Our core activities revolve around data capture, traceability, and control, in addition to Warehouse-level infrastructure.

Our mission is to assist our business partners in optimizing their technological processes, striving for sustained growth in their daily operations. We aim to incorporate business differentiators supported by excellence.

Solution

Since our arrival in this country, we settled in Doral, FL and established partnerships with various business chambers and organizations like Prospera with the aim of strengthening and enhancing our operation. Prospera is a crucial business partner for us, and we always seek their counsel before making significant decisions. We view them as an immediate consulting resource. Their assistance has been extensive, including developing a detailed business plan, access to capital, updating our website and marketing strategies, offering legal advice, and assisting us in various aspects of the business. Prospera holds a pivotal role in our journey, helping us address any needs that arise during our growth process. From our humble beginnings to the present day, they have been constant in their support, contributing significantly to our exponential expansion, both directly and indirectly.

The support we've received from several members of the Prospera team, including Angel Leon, Myrna Sonora, Jose Aguinaga have played a vital role in the collective growth of our organization. Their contributions have been invaluable, fueling our progress and success.

From the Owner

“My advice for those who wish to embark on an entrepreneurial journey is to never stop dreaming. This country allows dreams and goals to be achieved. Don't do it alone; seek support and guidance, just as we have done with Prospera, which has been our mentor to grow and reach our goals.”
