

INFORMATION SYSTEMS

You probably deal with **TECHNOLOGY** every day, but there is so much more to this exciting field than most people realize. With a degree in **INFORMATION SYSTEMS (IS)**, you can use your technical **SKILLS** and background to help your organization solve business challenges and compete more **EFFECTIVELY**. You might be a systems analyst or the person who can explain the complexities of the company's **TECHNOLOGIES** to your colleagues in other departments. You'll know how to apply **CYBERSECURITY** best practices and risk management to help keep your company's data safe. You'll also learn the **ANALYTICAL** skills needed to extract key data from company systems and the internet.
