FIU’s COLLEGE OF BUSINESS ADMINISTRATION OFFERS SESSION ON NEW INFORMATION SECURITY AND PRIVACY PROGRAM

Program Designed to Teach Valuable Skills to Protect from Hackers

WHAT: Florida International University’s College of Business Administration (CBA) will hold an information session on its new information security and privacy program.

The course was designed to help meet the growing demand for online security professionals as incidents of Internet hacking and identity theft continue to increase, resulting in billions of dollars in lost revenue. In order to overcome these problems, companies are seeking individuals who have the skills to protect their proprietary and valuable information.

Created in partnership with Guarded Networks, Inc., this special course teaches students how to become network security experts, qualify for the Prosoft Security Analyst Certificate, and prepare for the Certified Information Systems Security Professional credential.

Attend this special information session to learn more details.

WHEN: 11 a.m.
Saturday, April 26

WHERE: Florida International University
University Park Campus --11200 SW 8th Street
Ryder Business Building, Room 120

CONTACT: For more information or to RSVP call (305) 348-4217 or visit http://ope.fiu.edu.
